A sub-fund of Premier Liberation Fund

Objectives and investment policy

The aim of the Fund is to generate positive returns over a rolling 3 year basis. However, there is no guarantee that this objective will be achieved over that specific, or any, time period and there is always a risk of loss to your original capital.

The Fund will mainly invest in a broad range of investments that, when taken together, are expected to have a lower risk profile than investing in company shares directly.

The Fund is actively managed which means that the Fund Manager will choose the investments, currencies and markets held in the Fund but always within the boundaries outlined in the Fund's objective and policy.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

You can buy, sell and switch shares in the Fund on any UK business day. We will need to receive your instruction before 12 noon to buy shares at that day's price.

Terms Explained:

Accumulation Shares: any income made by the Fund will be reinvested to grow the value of your investment.

Income Shares: any income made by the Fund will be paid out to you.

Structured Investments: a group of financial instruments which frequently combine the potential upside of market performance with limited downside. They may also provide a fixed return in exchange for accepting a degree of risk or may generate gains from market falls. They can also be used within a Fund to help manage the impact of large stockmarket fluctuations.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The Fund is ranked as 3 because it has experienced low to medium rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The underlying assets held by the funds in which the Fund invests and the direct investments are diversified and chosen to produce a lower return volatility.

The indicator may not take fully into account the following risks of investing in this fund:

- Credit risk: if the issuer of an underlying security is unable to make income payments or to repay its debt.
- Liquidity risk: during difficult market conditions some securities, such as structured investments, may become more difficult to sell at a desired price. Some securities may have special liquidity arrangements within their documentation which allow them to temporarily suspend redemption; The Fund does not currently hold any securities which have suspended redemptions.
- Counterparty risk: arising from securities which require a specific entity, usually a large bank, to honour its obligations to the fund.
- Structured Investments: these investments are usually linked to the performance of an underlying index or group of assets and may, if certain criteria are met, experience a swift change in value.
- Legal or tax risk: arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.
