Objectives and investment policy

The aim of the Fund is to grow the value of your original investment over the long term.

The Fund will aim to invest in businesses with ethical, or socially responsible, principles.

The Fund has an independent Committee of Reference which meets regularly to discuss research on topical issues relating to the Fund's ethical criteria.

The Fund is actively managed which means that the Fund Manager will choose the investments, currencies and markets held in the Fund but always within the boundaries outlined in the Fund's objective and policy.

Due to the investment approach adopted for the fund, the impact of portfolio transaction costs, which are paid from the assets of the fund, may be material and are in addition to the charges set out below.

The full investment objective and policy, which outline all the eligible investments, are available in the Fund's prospectus.

Income shares: any income made by the Fund will be paid out to you.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

The Fund is ranked as 6 because it has experienced relatively high rises and falls in value over the past five years.

Please note that even the lowest ranking does not mean a risk-free investment.

The Fund holds equities concentrated in ethical business sectors which can carry a higher risk than funds holding more diversified assets by sector. Equities tend to experience higher volatility than many other asset types such as corporate bonds or money market instruments. The Fund may invest globally but has a strong concentration in the United Kingdom. Assets concentrated by geographic location are more vulnerable to market sentiment in that specific location and can carry a higher risk than funds holding more geographically diversified assets.

The indicator may not take fully into account the following risks of investing in this Fund:

- **Liquidity risk:** during difficult market conditions some securities in some locations may become more difficult to sell at a desired price.
- **Operational risk:** arising in particular from investments in overseas markets which may not have the same level of safekeeping and other controls as UK markets.
- **Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.

A more detailed description of the risks identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.
